

2 Hosts

The diagram illustrates a system with two hosts. At the top, the text "2 Hosts" is centered, with two diagonal lines extending downwards to the top corners of the two host boxes. Each host is represented by a large rectangle. Inside each rectangle is a smaller, rounded rectangle labeled "Process". A horizontal double-headed arrow connects the right side of the left process box to the left side of the right process box, indicating bidirectional communication between the two processes.
