

IEEE/ACM TRANSACTIONS ON

COMPUTATIONAL BIOLOGY AND BIOINFORMATICS

Subscribe for 2014 today! Not an IEEE member? Subscribe for only \$72 !

Keep up with the latest peer-reviewed research in computational biology and bioinformatics.

This journal publishes the algorithmic, mathematical, statistical, and computational methods, computation-centric biological studies, and software tools that are central in bioinformatics and computational biology including...

- Computational methods for omic data processing, interpretation and analysis
- Computational modeling and simulation of complex biological systems and processes
- Integrated computational and experimental studies of biological phenotypes
- Bioinformatic software tools and databases

Upcoming special features include...

- New Perspectives papers from prominent researchers, including Steven Salzberg and Liliana Florea
- Best Papers from GIW 2013, PRIB 2013, and APBC 2014

Member rate for bimonthly publication: \$40 electronic and print. Non-members can subscribe for \$72
