

Term Project Phase I: Finding Natural Breaks (Due 11:59 PM October 22, 2016)

Among all the values of the DSC Ratio in the MassHousing project, find the best group assignment if there are two groups. Please use the Natural Breaks method we discussed in the class to find the best group assignment.

One submission per team from the Team Lead. Please submit the source code of your program and results of your program.

Base Points: 100 points

Bonus Points: 100 Points

200 Points: If a team can complete the assignment on time

120 Points: If a team can finish the core calculations of the assignment on time
