

Group: Bee

Mahdi Almosawi

- Created the Navbar for the Bee site
- Aided in uniform formatting across the site
- Solely responsible for an estimated 50% increase in pollination levels reported in October 2025

Our Mission
Our mission is to spread the joy of the [Bee Movie](#) and the importance of bees to the world.

Who We Are
Founded by passionate students of CS410 at UMass-Boston, Beehive is a community-driven initiative focused on empowering learners and creators in the tech space. Just like bees work hard to pollinate flowers and give us honey, we strive to cultivate joy about the Bee Movie.

Team/Individual Artifacts

You can access all of our teams work with this link to our repository, where you will find that snippet for the navbar in every page, along with the style code for it in the main.css file. There is a link to our artifacts, which contains the log that tracks every change we made, and in the front page of the repo there is an images folder that contains all the graphics we used, including our very fun bee cursor.
