My Work on <u>Welkin's Wonders</u>

About Us page (full design + implementation)

Admin dashboard

Authentication page styling (login/sign-in/register)

Product create + edit pages (UI + styling)

Footer converted into reusable PHP component

Stripe integration setup (in progress)

Early checkout page + flow setup

Welcome to Welkin Wonders!

A space created to inspire balance and positivity. With a strong curiosity about crystals and the meaning people find in them, we developed this shop. Across cultures, crystals have been used as symbols of focus, energy, and intention. This experience was built to explore that idea in a creative, modern way through design, storytelling, and interactive experiences.
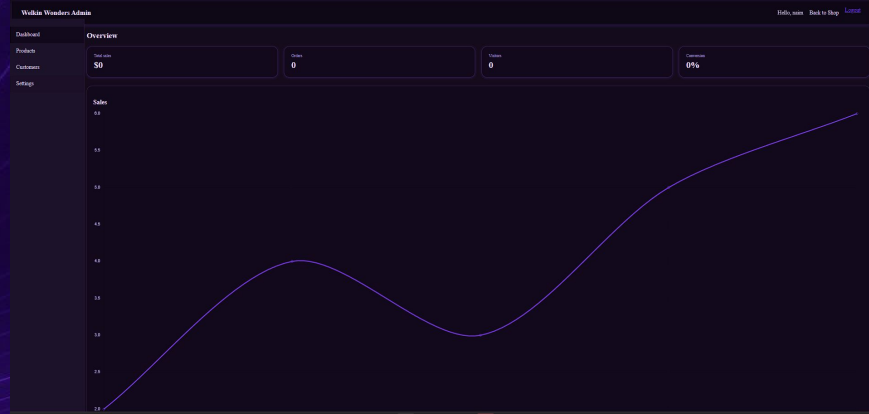

Alongside our crystal collection, we offer affirmations and readings to encourage reflection and self-awareness. These features are meant to be thoughtful pauses in a fast digital world, giving users a moment to reset and engage with something uplifting. Our kission was to create an exdperience that feels calming, welcoming, and empowering. At the heart of Welkin Wonders, is the belief that slowing down and engaging with meaning can create powerful change.

Welkin Wonders is more than just a shop, it's a digital sanctuary for curios and growth.
