Name- Mridhul Sharma
Team- Digital Signage
Team Members- Nu, Syed, Anika, Brandon

03/11/26

Requirement 1- Design the frontend layout of the long project website, including a drag-and-drop dashboard interface that allows users to add and arrange widgets and elements.

Requirement 2: Identify and assign specific pages or components to each developer so that work can proceed in parallel during the sprint.

Research: Can a backend system automatically detect when an ML model starts producing unreliable predictions?

This is a goose.
