

My Work on the Team Website:

- Wrote plant descriptions on the homepage explaining what the plants are known for
- Created review cards with star ratings, reviewer names, and dates
- Developed the Customer Reviews page using HTML, CSS, and JavaScript

File name: group3_artifact_sprint2.txt
Team3 - GT

In our sprint meeting, our team discussed that we will mainly focus on getting the Shop Page done today, while other team members work on other requirements. Below is what each team member will be working on for todays class:

Marc: Customer Reviews Page

David: Product cards for easy browsing

My Requirements:

Requirement 1: Display multiple customer review cards with star ratings - COMPLETE
Requirement 2: Create an interactive star rating system for user input - COMPLETE
Requirement 3: Allow users to submit a review and display it dynamically - COMPLETE

TEST DETAILS: go to <https://www.cs.umb.edu/~hdeblois/cs410/longproj01/t3-GT/index.html>

TEST 1 - Review display:

Open the reviews page in a browser.

Several review cards should appear showing star ratings, review text, reviewer name, and date.

Result: Review cards display correctly on the page. COMPLETE

TEST 2 - Submit a review:

Enter a name, select a star rating, and write a review. Then click the "Submit Review" button.

A new review card should appear at the top of the reviews section with the entered information.

Result: New review appears connectivly and displays the selected star rating. COMPLETE

```
<!-- REVIEW FORM -->
<div class="form-container">
<h2>Leave a Review :)</h2>
<label>Your Name</label>
<input type="text" id="input-name" placeholder="e.g. Alex G.">
<label>Your Rating</label>
<div class="star-picker" id="star-picker">
<span data-val="1"&#9733;</span>
<span data-val="2"&#9733;</span>
<span data-val="3"&#9733;</span>
<span data-val="4"&#9733;</span>
<span data-val="5"&#9733;</span>
</div>
<label>Your Review</label>
<textarea id="input-review" placeholder="Write your review here..."></textarea>
<button onclick="submitReview()">Submit Review</button>
</div>
```

Research Paper Topic: GitHub Branching Commands and Developers use them to organize code in teams.
