

Sepehr Rashighi

Long Project: Explore Minnie

Contributions: [Project Outline](#)

Code Contributions: Shell wrapper -
Currently in progress, the tool that wraps the shell to track user's progress as they learn with Minnie

All reports in /cs410 directory

Artifact: [Project flowmap \(WIP\)](#) A map of all the steps we intend to implement within Minnie prior to working with UMB CS servers

Project Diagram (On team directory)

Possible Research Paper Topic:

How the software engineering team roles will be shaped in a post AI world. How will the roles of individual engineers work? How will project leaders / managers find ways to contribute and manage both people and Agents
