

Team: B2 MAGE Platform

Initial website work	Organized team requirements, set up team Discord, aligned sprint planning, and owned auth / user-profile requirement planning for the starter site.
Code	mage-frontend mage-backend (accepted invite, cloned repos, reviewed Sprint 1 board, focusing on frontend first)
Team website	CS server temporary site - baseline website for Team T2
Artifacts	Team requirements.txt, sprint planning notes, Scrum role setup, Discord coordination, and baseline website planning in GROUP2 /t2 and details are in Artifact Repo
Research paper topic	Cybersecurity and AI: how AI is reshaping modern defense, threat detection, and attack surfaces as the field keeps evolving.

Quick links for grading

Reports are already in /home/mirahnaf/cs410/, so they are not repeated here.

Short Project Description

It's like a media platform for interactive music visuals, where users save and load presets instead of just playing songs.
