

ExploreMinnieDjango (Team 8)

Name: Ezequiel C.

Project Name: ExploreMinnieDjango (T8)

Work for team site: Tested Minnie and helped write requirements document

Research Paper topic: How IDEs (VS Code, JetBrains) securely connect to remote servers via SSH

Requirements

- Set up Minnie as is and review the current setup and test it's functionality
- Review Professor. DeBlois's current setup on Minnie and how the education environment is set up
- Read documentation of Apache to better understand how to properly utilize it and apply it to the CS server in the future
- Read documentation of Django
- Create a text file containing dialogue options for Minnie based on the progress of the user in the education module - Like a "did you mean..." prompt
- Possibly a man/help page on django as a template, for the step by step
- Contact **Tom Mullay** via email on applying Minnie's utility onto the CS servers
- Migrate Minnie's education module onto CS server - request a VM for testing
