Sprint 1 — March 5–10, 2026 Wonyong C.

- Team 5: Multilingual Virtual Assistant Mindfulness App
- Worked on the language selection prototype for the mindfulness assistant.
- Implemented a demo page that allows switching between Korean and English.
- Used HTML, CSS, and JavaScript to dynamically update interface text.
- Created a demo hosted on the CS server:
- https://www.cs.umb.edu/~hdeblois/cs410/longproj02/t5/langselect/
- Future work: connect language selection to the chatbot interface so mindfulness sessions appear in the selected language.
- Research Topic : The Importance of User Interface Design for Accessibility
