

Chelsea Nguyen

Team B3: Tech Cone Tracker

Frontend / Project Setup / Documentation / Deployment

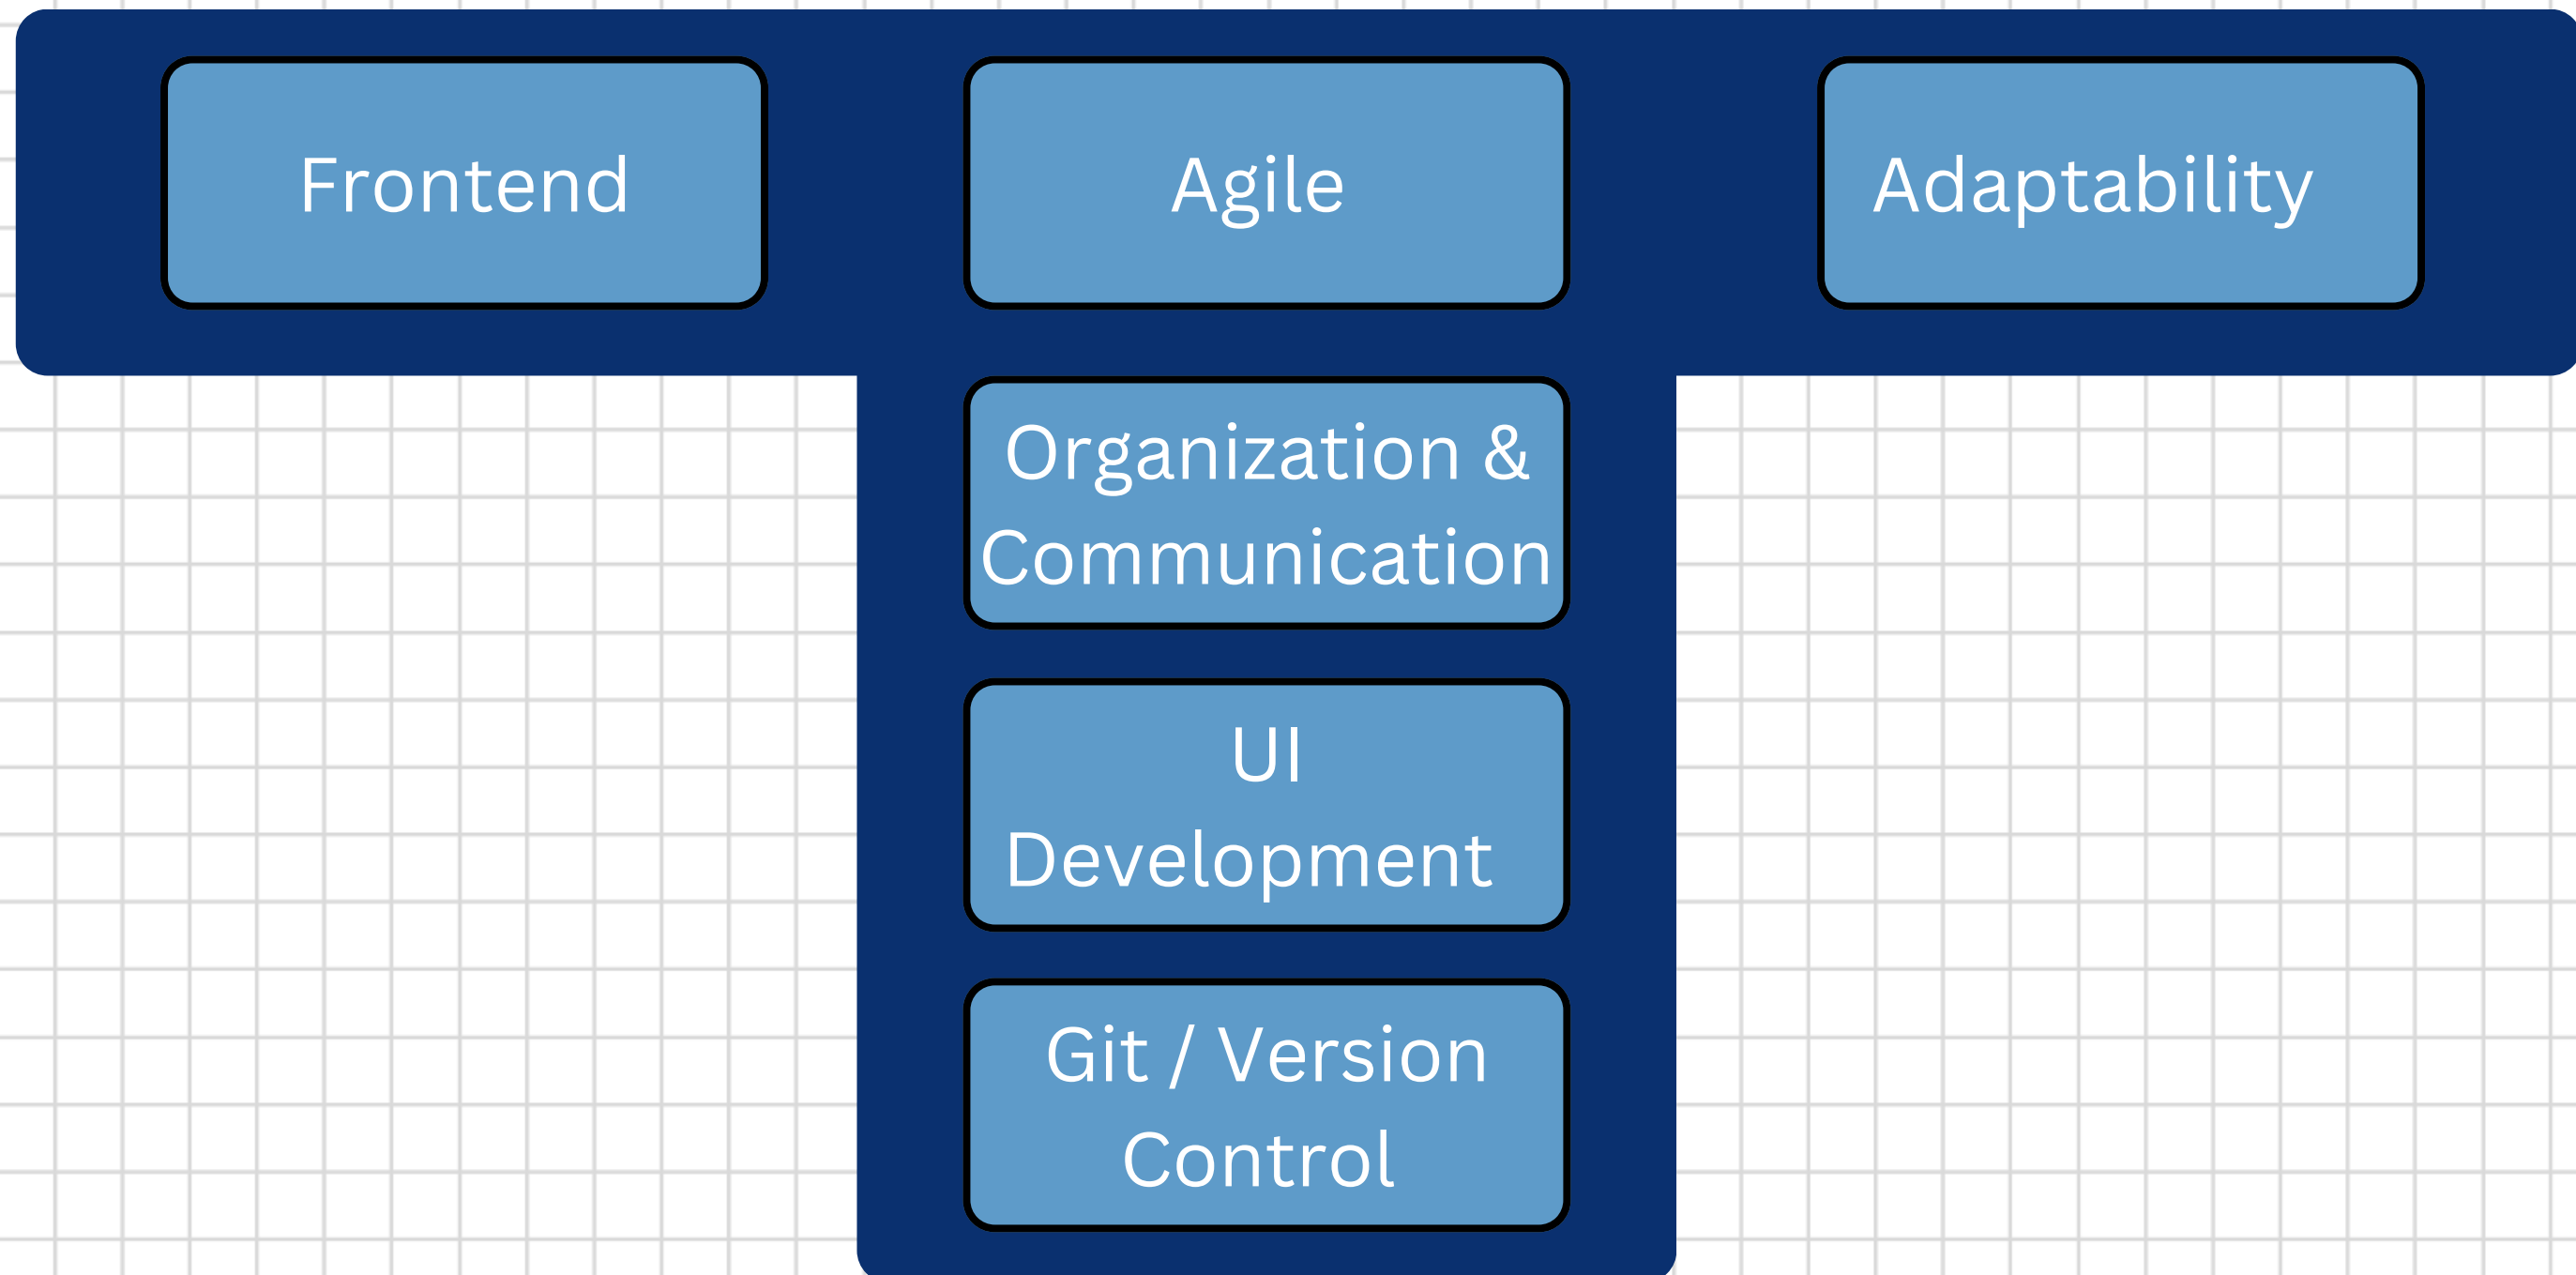

- Built React components as the site's entry point (home, about, contact, etc.)
- Update js for cross-page consistency
- Ran the production-build deployment spike that informed the pivot to Django
- Authored the project README (overview, getting started, tech stack, collaborators)

- **Artifacts:** `cd /courses/cs410/s26/hdeblois/GR0UP2/longproj02/t3/chelsea`
- **GitHub Code:** [Tech Cone Tracker Site](#)
- **Frontend Link:** [React](#) → [website code](#)
- **Deployment to run locally.**

T-Shaped Skills

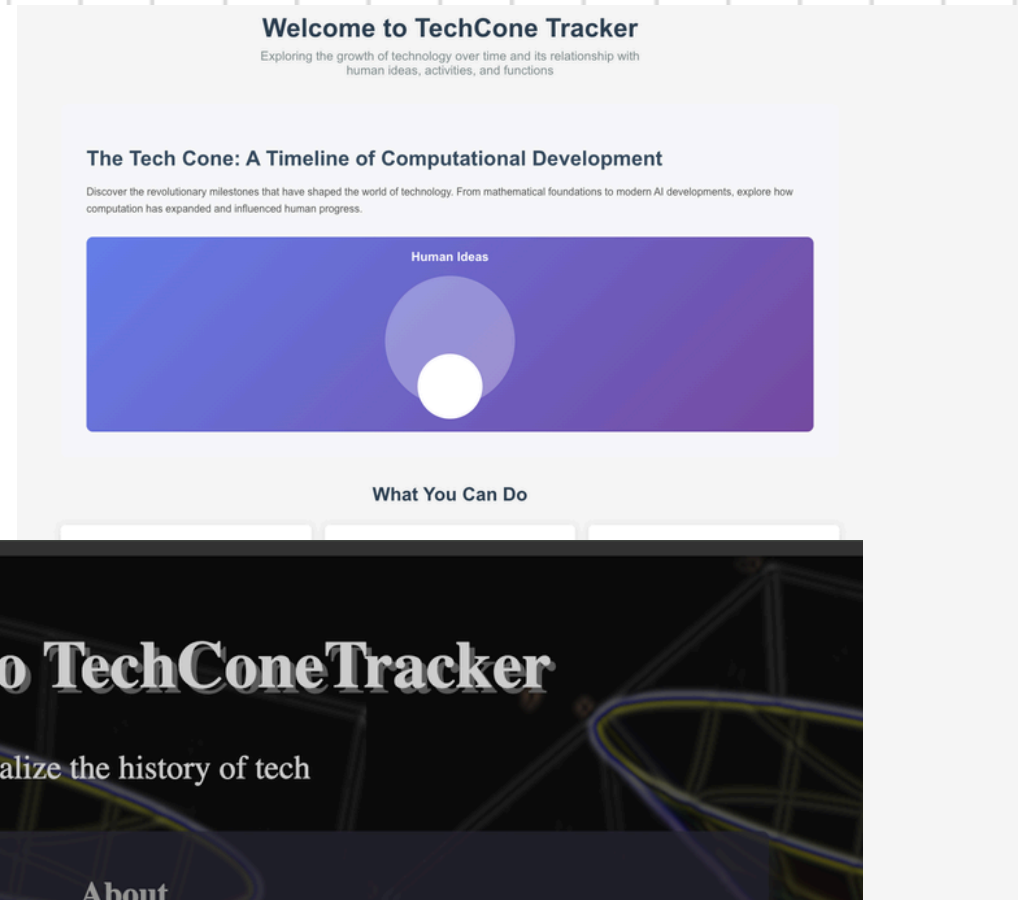

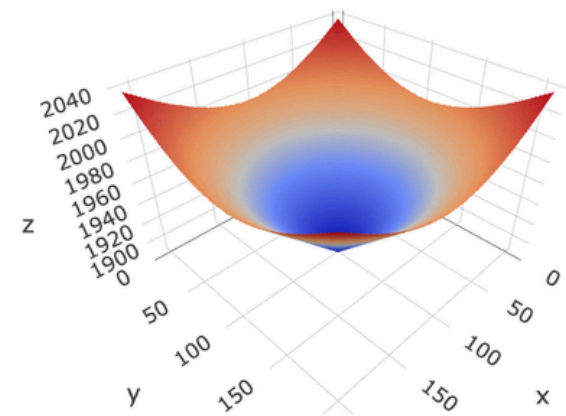

Initial comments to 5094.txt: `cd /home/chelsea`

Reflection

Website Progression

Comments

Challenges

- Coordinating frontend changes with team backend updates

Outcomes

- Built deeper CSS and responsive design skills
- Learned how small layout decisions shape overall feel of a site
- Working and iterating with a team rather than doing individual work
