

Manav J.

Team 7 · Student Resources Section

Built from Scratch

Created Student_Resources.html with 4 resource cards covering Internships, Career Opportunities, CS Clubs, and Research.

Real Working Links

Added Indeed, Google Careers, UMass ACES, Discord, and UMass Research links — replacing all placeholder # links.

Consistent Design

Matched navbar font (IBM Plex Sans) and header style to the Home page for a uniform look across the whole site.

Code: https://github.com/B7CSTour/LongProject1/blob/main/Student_Resources.html

Artifacts: </courses/cs410/s26/hdeblois/GROUP2/longproj02/t7/manav/>

Live Site: https://b7cstour.github.io/LongProject1/Student_Resources.html

T-Shaped Skills

How my skills evolved through the Long Project

HTML & CSS · **Git & GitHub** · **Team Collaboration** · **Responsive Design** · **Deployment**

Finding Real Links

Replaced placeholder # links with real sites like Indeed, Google Careers, and UMass ACES

Building the Card Layout

Made 4 resource cards using CSS Grid that resize on any screen

Matching the Team Style

Used the same font and navbar as my teammates so all pages look consistent

Additional Comments & Plans

What I learned

Building a real multi-page website with a team taught me how important consistent styling is. Small differences in fonts and spacing across pages make the site feel unpolished. I learned to match CSS from other team members' pages rather than just writing my own.

What I would improve

I would add a search filter to the resource cards so students can filter by category (internships vs research etc). I would also add more specific links like the UMass CS department's own career resources page.

Plans going forward

Keep the Discord link updated as invites expire. Add a 5th card for Graduate School resources since several CS students are interested in grad programs after graduating.
