

# Wilson Phan

Team:T3 Techcone Project

## Key Points:

- Worked on create/register account and implemented features for making password complexity
- Created data visualization from the csv files and made it into a graph
- Fix UI and bugs on the display of the data

Deployed Site: Work In Progress // Instructions to run locally on Github

Github: <https://github.com/B3TechCone/TechConeSite>

Artifacts: /courses/cs410/s26/hdeblois/GROUP2/longproj02/t3

Debugging

HTML/CSS

Java

UI/UX

Data visualization

Git/Github

Frontend engineering  
and Data Modeling

## **Additional Plans:**

Be able to import your own data into the graph to visualize it

Maybe add a current events tab related to the ever evolving techcone

Fix some bugs and make the UI more readable

## **Comments:**

Working in a team to implement code and ideas was intriguing

Developed my HTML/CSS and javascript skills
