BMC Software

1. Introduction

I've been working for BMC in its Waltham office since May 1998. Actually, at that time the whole Waltham location was a single company called BGS, which was acquired by BMC shortly after I was hired. BMC is a larger company of about 6,000 employees worldwide and is based in Houston, TX.

Both BGS and BMC have had a pretty tight relationship with the Computer Science department here at UMass/Boston.
