Program to make change.

@version 2

public class Change
{

  public static void main (String[] args)
  {
    Terminal terminal = new Terminal();

    int amount; // Amount, in cents

    amount = terminal.readInt();

    int dimes = amount / 10;
    amount = amount % 10;

    int nickels = amount / 5;
    amount = amount % 5;

    terminal.println(dimes + " dimes");
    terminal.println(nickels + " nickels");
    terminal.println(amount + " pennies");
  }
}

*/

*/

****

Program to make change.

Expression 2

Does the Terminal method readInt() for proceeded integer input.
