```
public class Change
{
  
  public static void main (String[] args)
  {
    Terminal terminal = new Terminal();
    int amount;

    amount = terminal.readInt("Amount, in cents: ");
    int dimes = amount / 10;
    amount = amount % 10;
    int nickels = amount / 5;
    amount = amount % 5;
    int dimes = amount / 10;
    amount = amount % 10;
    terminal.println(dimes + " dimes");
    terminal.println(nickels + " nickels");
    terminal.println(amount + " pennies");
  }
}
```
